Production Planning and Control C-Level Training

MODULE DESCRIPTION

caniasERP Production Management (PRD) module, with its adaptability to all production processes of the enterprise; contributes to the optimization of processes.

PRD module offers the possibility of single-level or multi-level production, at the same time it ensures to convert the production plans which are created by Material Requirement Planning module into production orders and managing them. The Production Management module can be integrated to the whole system and provides a successful data flow. By this way, companies can realize a transparent, consistent, reliable and efficient production process. Production orders created from the PRD module include the quantity, variant, bill of materials components and route operations of the product. While the creation of a production order, the missing items analysis is performed automatically. With the help of detailed planning types, this module provides the possibility of forward or backward scheduling and allows operations to be rescheduled. It can also obtain information about resources and the usage of the resources. It is also possible to compare planned/ actualized production levels, input quantities and production quantities on the module.

PRE-REQUISITES

- Having knowledge about Production Management and Planning

TRAINING OBJECTIVES

At the end of "Production Planning And Control C-Level Training", the participants will be able to:

—

// Have knowledge about production processes, operations, production orders and reports which contains production information,

// Have information about different concepts with different production order types and the integration between material requirement planning, capacity module and production modules,

// Have general knowledge about Production, Maintenance Management and the other modules related to the Production Module,

// Have general information on subjects such as external operation management and operation approvals included in the production module.
